## **Award for Excellence in Energy Conservation and Management**

### **OBJECTIVE**

To give national recognition to the selected Industrial units who have made systematic and serious attempts for efficient utilization and conservation of energy during the years 2014-15, 2015-16 and 2016-17.

### **THE AWARDS**

First prize and Second Prize are proposed to be given in each sub-sector in the form of gold and Silver Plaque respectively. Third Prize in the form of "Certificate of Merit". The performance of units would be judged through the questionnaire (format enclosed) which would be evaluated by an Award Committee.

### **ELIGIBILITY**

a) The scheme is open to all industrial units in the following sub-sectors:

Aluminum, Ceramics, Dairy, Fertilizers, Forging, Mining, Paints & allied products, Petroleum pipeline, Refinery, Soaps & Detergents and Automobile

Note: In case, less than 4 applications are received in any sub-sector, they will be grouped under General Category (Sub sectors of EC award) and be evaluated as per the Part - I and Part – II of the scheme.

### **Criteria for Judging Merit**

- a) Evaluation of the nominations will be done in two phases, based on the Evaluation and Weight age criteria as given in Annexure-A.
- b) In the first phase, evaluation will be made on the basis of the preliminary information, as required in Part - I and the best 10% of the participating industries (subject to minimum of 4 units) from each sector would be short listed.
- c) These shortlisted industries would then have to submit the details of the savings made and the projects implemented, as required in Part-II within 8 days from the date of intimation by BEE.
- d) The members of the Award Committee or their nominees may visit participating units for verification of data supplied, if felt necessary and it will be obligatory on the part of the participating units to provide necessary co-operation. The units have to bear all the expenditure in this connection.**
- e) The Committee's decision would be final and no appeal would be entertained.

### **Instructions for Filling up the 'Award Questionnaire'**

- a) The data required for the questionnaire pertains to the accounting years 2014-15, 2015-16 and 2016-17. If calendar year is the accounting year, then data should pertain to the years 2014, 2015 and 2016
- b) **The enclosed questionnaire is only a format and thus information sought should be separately computer printed or neatly typed or to be downloaded from Website: [www.beeindia.gov.in](http://www.beeindia.gov.in) .**
- c) **The answers to the questions should be precise and specific and should be supplied in total compliance with the questionnaire format. The deviations may lead to improper evaluation or the rejection of the nomination.**
- d) The information sought under any head should be highlighted under the same and no separate annexure should be attached.
- e) Each and every query mentioned in the questionnaire needs to be answered. Even, if answer is 'NO' or 'NOT APPLICABLE' the same may be stated, instead of ignoring it.

NATIONAL ENERGY CONSERVATION AWARD - 2017		
Evaluation and weightage criteria - LARGE/MEDIUM/SMALL Scale Industries		
S. No.	ITEM	Max 50 marks
<b>1</b>	<b>ENERGY SAVINGS - Electrical and Thermal</b>	<b>(20 marks)</b>
i	Electrical Energy (EE) savings in 2014- 2017 % savings in EE over the previous year energy consumption(2014-17)	
ii	Thermal energy savings in 2014-17 % savings in Thermal Energy over the previous year energy consumption( 2014-17)	
<b>2</b>	<b>SPECIFIC ENERGY CONSUMPTION REDUCTION</b>	
i	% SEC reduction during 2016-17 over 2015-16	
ii	% SEC reduction during 2015-16 over 2014-15	
iii	% SEC reduction during 2014-15 over 2013-14	
<b>3</b>	<b>Specific Energy Consumption Comparisons with the best reported values among the participating units</b>	<b>(8 marks)</b>
<b>4</b>	<b>ISO 50001 EnMs certified units</b>	<b>(2 marks)</b>

- NOTE:**
- The above evaluation and weightage criteria is common for all the participating units. However for some sectors, the application of the above E& W criteria may not be feasible due to certain peculiar characteristics of the concerned sectors. Therefore, Award Committee reserves the right to modify the criteria for a particular sector, which shall be uniformly applied to all the participating units of that sector.
  - The distribution of weightage between specific electrical and thermal energy consumption reduction for a particular sector would be decided by the Award Committee
  - For those particular sectors, where it is not feasible to compare SEC with best reported value, 50% of the weightage may be merged with S.No.-2 and the balance 50% with S.No.-1, or as decided by the Award Committee
  - The participating units having negative specific electrical or thermal energy consumption will not be considered for the award.
  - For all the evaluation criteria, if the difference between the first and second unit in the particular criteria is more than 10% in the percentage score, then the second best unit will be awarded 10% less marks than that of the first unit and prorate will start from that unit onward. Similarly, if the difference between second and third unit is also found to be more than 10% ,the above methodology will be followed till the completion of the evaluation criteria of all the units
  - If it is found that for a particular unit in a particular sector, % SEC reduction is exceptionally high mainly due to increased capacity utilization or changes in the manufactured product combination and is affecting the weightage of other units, Award Committee reserve the right to modify the Evaluation & Weightage criteria for that sector
  - The weightage criteria for three years i.e. 2014-15, 2015-16 and 2016-17 will be in the ratio of 30:30:40
