

Date: 31st January 2024

Time: 11:AM to 12:00 PM

Medium: Online

Minutes of pre-bid meeting for clarification of the queries raised against the RfP floated for “Hiring of Expert Agency for Training of prospective Carbon Verifiers under the CCTS Framework”.

A pre-bid meeting for clarification of the queries raised for the RfP floated on GEM for the above-mentioned subject was convened on 31st January 2024 at 11:00 AM virtually on MS Team.

The following queries were discussed and replied during the meeting: -

S. No.	Clause/ Reference	Comment/Suggestion	Reply of queries
1.	5.0 Qualification Criteria (Point No 5.1.2): The agency should be accredited by NABCB for the provision of verifications as per ISO 14064/ISO 14065/ISO 17029. The Agency should be authorised to give ISO14064 lead verifier certification to the participants who pass the assessment after each training session.	It was suggested that the requirement for the agency to be accredited by NABCB for the provision of verifications as per ISO 14064/ISO 14065/ISO 17029 be dropped.	It has been decided that the requirement of accreditation of the agency by NABCB be retained. Currently, all agencies conducting verification activities in the CDM and Voluntary Carbon Markets are NABCB accredited. It is therefore essential that the agencies hired for the purpose of training prospective Accredited Carbon Verifiers have accreditation from NABCB.

Conclusion:

As such the queries have been nominal and no changes have been proposed.
