## Form-Input energy (Details of Input energy & Infrastructure)

### A. Summary of energy input & Infrastructure

| S. No | Parameters  | Period From 1st<br>Jul 23 – 30th<br>Sep 23 | Remarks (Source of data)  |
|-------|---|--|---|
| A.1   | Input Energy purchased (MU)   | 2681.19                                    | MERC Truing up is not yet occurred, hence provisional based on internal data source |
| A.2   | Transmission loss (%)   | 3.25%                                      | Based on Monthly loss declared by SLDC  |
| A.3   | Transmission loss (MU)  | 87.06                                      |   |
| A.4   | Energy sold outside the periphery (MU)  | 0  |   |
| A.5   | Open access sale (MU)   | 454.01                                     | Open Access + COC: provisional based on internal data source                        |
| A.6   | EHT sale  | 19.78                                      | 110kV METRO   |
| A.7   | Net input energy (received at DISCOM periphery or at distribution point, after adjustment)-(MU) | 3048.13                                    | Network Input energy<>D (Incl. EHT Sales)   |
| A.8   | Is 100% metering available at 66/33 kV (Select yes or no from list)                             | Yes  |   |
| A.9   | Is 100% metering available at 11 kV (Select yes or no from list)                                | Yes  |   |
| A.10  | % Of metering available at DT   | 100%                                       |   |
| A.11  | % Of metering available at consumer end   | 100%                                       |   |
| A.12  | No of feeders at 66kV voltage level   | 0  |   |
| A.13  | No of feeders at 33kV voltage level   | 263  | Including 22kV feeders  |
| A.14  | No of feeders at 11kV voltage level   | 1321                                       |   |
| A.15  | No of LT feeders' level   | 0  |   |
| A.16  | Line length (ckt. km) at 66kV voltage level   | 0.00                                       |   |
| A.17  | Line length (ckt. km) at 33kV voltage level   | 1120.37                                    | GIS (underground cable)   |
| A.18  | Line length (ckt. km) at 11kV voltage level   | 3944.40                                    | GIS (underground cable)   |
| A.19  | Line length (km) at LT level  | 20722.93                                   | GIS (underground cable, including streetlight)                                      |
| A.20  | Length of Aerial Bunched Cables   | 0.00                                       |   |
| A.21  | Length of Underground Cables  | 25787.70                                   | GIS (Total length HT, LT, and Streetlight)  |
| A.22  | HT/LT ratio   | 0.24                                       |   |

| B. Meter reading of Input energy injection points |      |        |                    |                |                    |           |                     |   |   |                 |   |   |  |                                      |            |             |             |             |       |                          |

\*\* Note - It shall be mandatory to record the energy supplied separately for each category of consumers which is being provided a separate rate of subsidy in the tariff, by the state government, so that the subsidy due for the electricity distribution company is quarterly calculated by multiplying the energy supplied to each of such category of consumers by the applicable rate of subsidy notified by the state government  
Billing energy and amount is as per billing month and collection is as per due date of respective billing months.  
No of consumers as per consumer category and their connected load is as per the last billing month of the quarter.  
KWH energy of HT consumers is derived from metered KVAH and average PF for calculation of divisional energy inputs.  
Change over consumers no, connected load and energy sale is included in the report.

Note:

In AEML we do not have zone, circle entire distribution area is divided into 7 nos. of divisions & 25 nos. of subdivisions.

Meters are read manually using CMRI / Mobile as of now on monthly basis.

DT mapping on feeders is done, however, due to changes in network for planned and unplanned outages the final export at feeder level is getting affected.

Due to ring main system and dynamic changes in the HT network under fault or planned outages, loss calculation is difficult till complete implementation of AMR for feeder and DT metering.

AMR - Static communicable meters & AMI - Smart meters

**Details of DT-wise losses (please add more rows as per requirement)**

| Zone Name | Circle Name | Division Name | Name of the Subdivision. | Name of the Substation                | Substation Code | Name of the 11 kV Feeder | Feeder Code | Name of the Location where DT situated | DT Code | DT Capacity (kVA) | Predominant consumer type of DT (Domestic/Industrial/Agriculture/Mixed) | Type of metering AMR/AMI/Communicable/Conventional meter/Unmetered. | Status of Meter whether Functional (Yes/No) | % of data received automatically if AMR/AMI | No of Connected Consumers | Input Energy (MU) (A) | Billed Energy (MU) (B) | Loss (MU) (A - B) | % Loss (A-B)/A |

**Note:**

Substation ID - SAP code of respective substation, Feeder ID - Feeder switch no

DT Meters are read manually using CMRI as of now on monthly basis and reset reading is used for consumption calculation.

Energy meters are connected for each DT, however, input energy consumption is the sum of the DTs installed in the respective substation.

Billed Energy - it is the summation of the prorated consumption of the consumers tagged to the respective substation as per the monthly billing cycle.

Due to back feeding arrangement at LT network and dynamic changes in the LT network under fault or planned outages, loss calculation is not very accurate till complete implementation of AMR for DT metering and LT consumers.

Abnormal (Negative or 100%) loss is due to the pending consumer tagging updation on GIS

**Annexure - 1: Proforma for Quarterly Consumer Category-wise Subsidy billed/Received/Due for period 1st Apr 23 – 30th Jun 23**  
**We do not give / receive any subsidy, hence details in proforma for quarterly consumer category wise subsidy billed / received is not provided**

I/We undertake that the information supplied in this Document and Pro-forma is accurate to the best of my knowledge and if any of the information supplied is found to be incorrect and such information result into loss to the Central Government or State Government or any of the authority under them or any other person affected, I/we undertake to indemnify such loss.
