**The Ministry of Power to celebrate “Energy Conservation Day 2023” tomorrow. President of India to felicitate the winners of National Energy Conservation Awards, National Energy Efficiency Innovation Awards, National Painting Competition Prizes New Delhi, 13 December**

The National Energy Conservation Day is celebrated every year on December 14. The Purpose is to showcase the achievement of the nation in energy efficiency and conservation. Smt. Droupadi Murmu, the **Hon’ble President of India**, will be the Chief Guest at the event. Shri R. K. Singh, **Union Minister of Power, New & Renewable Energy** will address on this occasion. Shri Krishan Pal, Minister of State for Power & Heavy Industries, Shri Pankaj Agarwal, Secretary, Ministry of Power will also be present. The Hon’ble President of India will felicitate the winners of the National Energy Conservation Awards, National Energy Efficiency Innovation Awards, National Painting Competition Prizes and oversee the screening of a film on Energy Conservation

The main attraction of the event will be:

- National Energy Conservation Awards (NECA) 2023
- National Energy Efficiency Innovation Awards (NEEIA) 2023
- National Painting Competition for school children 2023
- The screening of a film on Energy Conservation

**National Energy Conservation Award 2023**

To raise awareness about energy efficiency and its conservation, the BEE, under the guidance of Ministry of Power, recognizes and encourages endeavours of industrial units, institutions, and establishments in reducing energy consumption by felicitating them with Energy Conservation Awards on the occasion of National Energy Conservation Day, celebrated on 14th December every year.

The applications for NECA 2023 were invited till 9th November 2023 and total 516 applications have been received.

**Total number of awards for NECA 2023**

1st PRIZE	20
2ND PRIZE	16
CERTIFICATE OF MERIT (COM)	27

**National Energy Efficiency Innovation Awards (NEEIA) 2023**

To recognize outstanding work and innovative minds of India in the area of Energy Efficiency, NEEIA awards were started in the year 2021. Applications for NEEIA 2023 are invited online from various categories viz. Category A: Industries, Building and Transport and Category B: Students and Research Scholars.

The awards are evaluated based on Replicability, Affordability, Reliability, Impact on Energy Savings and Impact on Environment & Sustainability

The applications for NEEIA 2023 were invited till 9<sup>th</sup> November 2023 and total 187 applications have been received.

### Total number of awards for NEEIA 2023

1st PRIZE	1
2ND PRIZE	1
CERTIFICATE OF RECOGNITION (COR)	6

### National Painting Competition 2023

To continually bring change in the society towards conservation and efficient use of energy, the Ministry of Power is organizing National Painting Competition on Energy Conservation since 2005. The competition is held in three stages, namely, School, State and National Level. The Painting Competition is being organized for students of 5th, 6th and 7th Standards under Group 'A' and of 8th, 9th and 10th standards under Group 'B'.

State/ UT & National Level Painting Competition				
Group A :(5th, 6th& 7th Standard)			Group B : (8th, 9th& 10th Standard)	
Prize* (In Each category)	State/UT Level Prize		National Level Prize	
	Group 'A'	Group 'B'	Group 'A'	Group 'B'
First Prize/Gold Medal (01 No.)	Rs. 50,000/	Rs. 50,000/	Rs 1,00,000/-	Rs 1,00,000/-

Third Prize/Bronze Medal (01 No.)	Rs 20,000/-	Rs 20,000/-	Rs 30,000/-	Rs 30,000/-
Appreciation Prize (10 Nos.)	Rs 7,500/-	Rs 7,500/-	Rs 15,000/	Rs 15,000/

\*Winners will also be awarded the laptops / tablets and will also get an opportunity for study tour within India.

### About BEE

The Government of India set up the Bureau of Energy Efficiency (BEE). on 1st March 2002 under the provisions of the Energy Conservation Act, 2001. The mission of the Bureau of Energy Efficiency is to assist in developing policies and strategies with a thrust on self-regulation and market principles, within the overall framework of the Energy Conservation Act, 2001 with the primary objective of reducing the energy intensity of the Indian economy. BEE coordinates with designated consumers, designated agencies and other organizations and recognise, identifies and utilise the existing resources and infrastructure, in performing the functions assigned to it under the Energy Conservation Act. The Energy Conservation Act provides for regulatory and promotional functions.

**President Commends India's Pioneering Environmental Stewardship on National Energy Conservation Day**

- Hon'ble President of India presents National Energy Conservation Awards and National Energy Efficiency Innovation Awards.
- India's Leadership on Energy Transition Highlighted on National Energy Conservation Day"
- From G-20 Presidency to Clean Energy Targets: India's Pioneering Role in Sustainable Planet.

New Delhi, 14 Dec 2023

Ministry of Power celebrated National Energy Conservation Day today. Hon'ble President of India Smt Droupadi Murmu felicitated winners of the 33rd National Energy Conservation Awards (**NECA**) and 3<sup>rd</sup> National Energy Efficiency Innovation Awards (**NEEIA**). The school children were also given prizes under the National Painting Competition on Energy Conservation.

On this occasion, the Hon'ble President of India, Smt. Droupadi Murmu, congratulated the awardees, with special mention for the artistic impression on sustainable planet by the children.

President said", I extend my congratulations to the young winners of the painting competition. The school age is the ideal time to instill the habit of sustainable lifestyle and children, known as the best agents of change, can play a crucial role. It is imperative to equip them with information and knowledge on energy conservation, fostering interest in this vital topic.

As we mark this significant day, let's recognize India's recent achievement in hosting the G-20 presidency—an opportunity that elevated India's pivotal role on the world stage in saving our planet, said Hon'ble President of India, Smt. Droupadi Murmu, she remarked that India's rapid deployment of renewables underscores our commitment to maximize the utilization of natural sources such as wind, solar, water, and biomass.

Addressing the gathering, the Hon'ble Power Minister highlighted India's leading role in climate change mitigation and sustainable development, emphasizing the nation's commitment to achieve "Panchamrit Goal".

In a noteworthy address, the Hon'ble Power Minister emphasized India's bold initiatives in clean energy transition and unwavering commitment to ensure affordable and reliable energy to all citizens.

Through National Award, the Hon'ble President acknowledged the efforts of the industry and urged for a sustained commitment to energy efficiency, emphasizing its key role in securing a greener economy.

I am pleased to emphasize the significant impact of various energy efficiency initiatives, resulting in an annual cost savings of INR 1.6 Lakh Crores and a reduction of 280 million tonnes of CO<sub>2</sub> emissions, said Power Minister.

The function was held with stakeholders from various sectors across the country and the awardee children of the painting competition gathered from all the states there to witness NECA-2023.

The **NECA** Awards were presented to the best performers from various sectors, including

Industries, Transport, Building, Institution and Appliances. The NEEIA (National Energy Efficiency Innovation Awards) were presented to the innovator under the Industry and Transport categories.

Shri Krishan Pal, Minister of State for Power & Heavy Industries, and Shri Pankaj Aggarwal, Secretary (Power), Govt of India also graced the occasion and highlighted the impact of BEE programmes in the country.

### **About the Painting Competition, NECA and NEEIA Awards**

The National Painting Competition on Energy Conservation in 2023 aimed to instill the practice of conservation at a young age, recognizing children as catalysts for change. The Ministry of Power organized this competition to drive societal change towards the conservation and efficient utilization of energy. The competition was held in three stages, namely, School, State, and National Levels. The last date for participation in National Painting competition 2023 was 9th November 2023. Around 70 Lacs students from 98,000 schools across the country participated in the National Painting Competition 2023.

In promoting awareness regarding energy efficiency and conservation, the Bureau of Energy Efficiency (BEE), assisted the Ministry of Power, recognized the efforts of industrial units, institutions, and establishments that demonstrated reduces in energy consumption through the Energy Conservation Awards. These annual awards were presented on National Energy Conservation Day, i.e., December 14th. The applications for NECA 2023 were invited until 9th November 2023, and a total of 516 applications were received.

Online applications for NEEIA 2023 were solicited across distinct categories: Category A included professionals from Industries, Buildings, and Transport sectors, while Category B encompassed Students and Research Scholars. These awards were assessed considering factors such as Explicability, Affordability, Reliability, as well as their Impact on Energy Savings and Environment & Sustainability. The applications for NEEIA 2023 were invited until 9th November 2023, and a total of 187 applications were received.

The National Energy Conservation Day is being celebrated every year on December 14. The Bureau of Energy Efficiency (BEE), under Ministry of Power spearheads the celebrations every year. The objective is celebrate the National Energy Conservation Day to drive mass awareness about the importance of energy efficiency and conservation, and thereby saving natural resources for greener planet.

### National Energy Conservation Day: Tips to conserve energy at home

Thursday 14th December, 2023

HOME » NEWS » FESTIVALS & EVENTS » NATIONAL ENERGY CONSERVATION DAY: TIPS TO CONSERVE ENERGY AT HOME

Every year the National Energy Conservation Day is celebrated on December 14 to create awareness about the significance of energy conservation.

Every year the National Energy Conservation Day is celebrated on December 14 to create awareness about the significance of energy conservation and also to promote sustainable energy practices. The day reminds us that nature has limited resources and hence the best thing to do is to reduce the consumption of energy and protect the environment.

Always turn off switches when not in use

Make it a habit to switch off the button of a light or electronic/electrical equipment or product when you are not using it. Ensure that your video game consoles, computer, television, digital video recorders, or cable boxes are completely switched off when you are not using them or retiring for the day. If possible keep them unplugged in case you are going away for a few days.

Very few people are aware that chargers of small devices like cell phone chargers, tablets, and cordless devices keep on using energy even when they are not charging. It is better to turn off the button to save energy. Computers also use energy even when they are in hibernate or sleep mode. Although they use very little energy when not active if you are not going to be active on the computer for a couple of hours it is better to shut it down.

Similarly, modern computers do not need screen savers. So skipping them and making the desktop directly accessible is another way of conserving energy.

Avoid using more energy than needed

Undoubtedly, kitchen appliances and machines like dishwashers and washing machines save a lot of effort and time. However, they also consume a lot of energy, both electricity and water. So, unless very urgent avoid running a dishwasher or washing machine unless it is fully loaded.

Similarly, ensure that you empty the refrigerator and turn it off before going on a long vacation. It will certainly save a lot of energy.

## World Energy Conservation Day 2023: 10 Easy Ways for Kids to Conserve Energy at Home, School

Thursday 14th December, 2023

World Energy Conservation Day 2023: Instilling eco-friendly habits in children from a young age is crucial for a sustainable future.

World Energy Conservation Day, observed annually on December 14, serves as a reminder of the critical importance of preserving energy resources. Energy conservation involves using less energy and minimising unnecessary waste. Simple practices like turning off electronic appliances when not in use contribute significantly to this effort. Instilling eco-friendly habits in children from a young age is crucial for a sustainable future. Here are 10 easy ways for kids to contribute to energy conservation both at home and school.

### 10 Ways To Conserve Energy

**Reduce Electronic Usage** Encourage your children to reduce their screen time. Turning off electronic devices when not in use not only saves electricity but also promotes a healthier lifestyle. Suggest engaging in outdoor activities or reading a book instead of spending excessive time in front of screens.

**Take a Shower Instead of a Bath** Encourage your children to opt for showers instead of baths, as showers typically use less water. Help them understand that by keeping their showers short, they can actively contribute to both water and energy conservation. It's a small but impactful way for them to play a part in caring for the environment.

**Switch-Off Appliances** Teach your kids to turn off lights, fans, and electronic devices when leaving a room. Make it a habit to switch off appliances completely, as standby mode still consumes energy. Consider using power strips for multiple devices in a room. This makes it easier to turn off multiple devices at once when they're not in use.

**Don't Leave the Fridge Door Open** Remind kids to close the refrigerator door promptly after use. Keeping the fridge closed helps maintain the desired temperature inside, reducing the energy required to cool it down again.

**Plant a Tree** Teach children about the crucial role trees play in maintaining ecological balance. Select a suitable location for planting a tree. It could be in your backyard, a community garden, or as part of a local environmental initiative. Explain to them about the proper care and maintenance of the tree.

**Walk to School** Walking or cycling to school provides an opportunity for kids to incorporate extra exercise into their daily routine. Explain the health benefits of regular physical activity. This approach also helps to diminish the volume of vehicles on the road and concurrently mitigate environmental pollution caused by cars.

**Use a Reusable Water Bottle** Help kids understand the environmental impact of single-use plastic by providing them with reusable water bottles. This reduces the need for manufacturing new plastic bottles and decreases the amount of waste in landfills.

**Recycle** Teach children about the importance of recycling. Set up designated bins for paper, plastic, and glass at home and encourage them to recycle at school. Explain how recycling helps conserve energy by reducing the need for the production of new materials.

**Classroom Jobs** In school, children can take an active role in energy conservation by asking their teachers about classroom jobs related to turning off lights, organizing recycling efforts, or monitoring energy usage. This will make them responsible and will also foster a sense of ownership in preserving resources.

**Layer Up** Instead of relying solely on heating appliances in colder weather, encourage kids to layer up with warm clothing. This reduces the need for constant heating, thereby conserving energy.

## Save Energy Conservation Day- राष्ट्रीय ऊर्जा संरक्षण के उपाय

Thursday 14th December, 2023

# THE HIND MANCH

राष्ट्रीय ऊर्जा संरक्षण दिवस आज-जाने ऊर्जा और अपने धन को बचाने के उपाय

ऊर्जा मंत्रालय के अधीन ब्यूरो ऑफ एनर्जी एफिशिएंसी (BEE) द्वारा हर साल 14 दिसंबर को देश भर में Save Energy Conservation Day के रूप में मनाया जाता है। यह दिन लोगों के बीच ऊर्जा संरक्षण और ऊर्जा दक्षता के महत्व के साथ-साथ जलवायु परिवर्तन शमन के लिए समग्र विकास के लिए जरूरी समग्र प्रयासों के लिए जागरूकता बढ़ाने के लिए मनाया जाता है।

देश में आज ऐसे आयोजित होगा राष्ट्रीय ऊर्जा संरक्षण दिवस, राष्ट्रपति के हाथों पुरस्कार की भी होगी घोषणा:-

->इस बार राष्ट्रपति द्रौपदी मुर्मु 14 दिसंबर, 2023 को नई दिल्ली के विज्ञान भवन में आयोजित होने वाले Save Energy Conservation Day 2023 समारोह में भाग लेंगी। इस अवसर पर राष्ट्रपति उपस्थित जनसमूह को संबोधित करेंगी और राष्ट्रीय ऊर्जा संरक्षण पुरस्कार 2023, राष्ट्रीय ऊर्जा दक्षता नवोन्मेषण पुरस्कार 2023 और ऊर्जा संरक्षण पर राष्ट्रीय चित्रकला प्रतियोगिता 2023 के विजेताओं को सम्मानित भी करेंगी। केंद्रीय विद्युत और नवीन एवं नवीकरणीय ऊर्जा मंत्री आरके सिंह इस अवसर पर कार्यक्रम को संबोधित करेंगे। वहीं केंद्रीय विद्युत और भारी उद्योग राज्य मंत्री कृष्ण पाल और विद्युत मंत्रालय के सचिव पंकज अग्रवाल भी इस मौके पर उपस्थित रहेंगे।

जाने ब्यूरो ऑफ एनर्जी एफिशिएंसी के बारे में:-

●ऊर्जा दक्षता ब्यूरो एक संवैधानिक निकाय है जो भारत सरकार के अंतर्गत आता है और ऊर्जा उपयोग को कम करने के लिए नीतियों और रणनीतियों के विकास में मदद करता है। भारत में ऊर्जा संरक्षण अधिनियम को वर्ष 2001 में ब्यूरो ऑफ एनर्जी एफिशिएंसी (BEE) द्वारा निष्पादित किया गया था।

दिवस को मानने का मुख्य उद्देश्य :-

ऊर्जा के अपव्यय को कम करने, ऊर्जा बचाने और इसके संरक्षण के महत्व के बारे में लोगों को जागरूक करने के लिए ही देश में Save Energy Conservation Day मनाया जाता है।दिवस के आयोजन का मुख्य उद्देश्य ऊर्जा के अनावश्यक उपयोग को न्यूनतम करते हुए लोगों को मानवता के सुखद भविष्य के लिए ऊर्जा की बचत के लिए प्रेरित करना ही है।

इन छोटे उपायों से आप ऊर्जा और धन दोनों को बचा सकते हैं :-

●भवन निर्माण के चारों ओर वृक्ष लगाए-

भवन निर्माण के समय प्लाट के चारों ओर वृक्ष लगाए जाएं तो प्रचंड गर्मी में भी भवन गर्म होने से बचेंगे और कूलर, एसी इत्यादि की जरूरत कम होगी। मकानों या कार्यालयों में दीवारों पर हल्के रंगों के प्रयोग से कम रोशनी वाले बल्बों से भी कमरे में पर्याप्त रोशनी हो सकती है। इससे न केवल ऊर्जा संरक्षण अभियान में सहभागी बनकर हम भविष्य के लिए ऊर्जा बचाने में मददगार बनेंगे बल्कि अपना बिजली बिल भी सीमित रख सकेंगे।

●सार्वजनिक स्थानों पर सौर लाइटों का करे प्रयोग-

सार्वजनिक स्थानों पर सौर लाइटों की व्यवस्था होनी चाहिए।जिससे ऊर्जा की बचत तो होगी ही साथ ही साथ रिसर्च में यह पाया गया है कि कार्यालयों में कृत्रिम रोशनी वाले स्थानों पर काम करने से कर्मियों में तनाव, सिरदर्द, रक्तचाप, थकान जैसी स्वास्थ्य संबंधी समस्याएं देखी जाती हैं और उनकी कार्यकुशलता पर भी नकारात्मक प्रभाव पड़ता है। इसलिए ऑफिस में यदि पर्याप्त प्राकृतिक रोशनी का व्यवस्था हो तो इससे ऊर्जा संरक्षण होने के साथ-साथ कर्मचारियों की कार्यक्षमता भी बढ़ती है।

● जल का दुरुूपयोग करने से बचे तो ऊर्जा की भी होगी बचत-

प्रतिवर्ष देश में हजारों गैलन पानी बर्बाद होता है, इसलिए ऊर्जा संरक्षण की बात करते समय जल की बर्बादी को रोकने पर पर्याप्त ध्यान दिया जाना भी बेहद जरूरी है। न केवल भारत बल्कि पूरी दुनिया के समक्ष बिजली जैसी ऊर्जा की महत्वपूर्ण जरूरतें पूरी करने के लिए सीमित प्राकृतिक संसाधन हैं, साथ ही पर्यावरण असंतुलन और विस्थापन जैसी गंभीर चुनौतियां भी हैं।

●ऊर्जा को बचाने के लिए यह भी कर सकते हैं आप-

उपयोग में न होने पर लाइटें और उपकरण बंद कर दें।ऊर्जा-कुशल उपकरणों का उपयोग करें।

वाहन चलाने के बजाय पैदल चलें, साइकिल चलाएं या सार्वजनिक परिवहन का उपयोग करें।

कार्बन डाइऑक्साइड को सोखने के लिए पेड़ लगाएं।

ऊर्जा संरक्षण के महत्व के बारे में दूसरों को शिक्षित करें।◆"आग ने हमें इंसान बनाया, जीवाश्म ईंधन ने हमें आधुनिक बनाया, लेकिन अब हमें एक नई आग की जरूरत है जो हमें सुरक्षित, स्वस्थ और टिकाऊ बनाए।" – अमोरी लोविस

◆"जीवाश्म ईंधन पर हमारी निर्भरता वैश्विक पायरोमेनिया के बराबर है, और हमारे पास उपलब्ध एकमात्र अग्निशामक यंत्र नवीकरणीय ऊर्जा है।" – हरमन शीर

Save Energy Conservation Day पर आज आप ऐसे आयोजित कर सकते हैं कार्यक्रम :-

■ऊर्जा-बचत प्रथाओं पर जागरूकता अभियान, कार्यशालाएँ और सेमिनार आयोजित करें।

बर्बादी की पहचान करने के लिए घरों, कार्यालयों और उद्योगों में ऊर्जा ऑडिट करें।

ऊर्जा-कुशल उपकरणों, प्रकाश व्यवस्था और नवीकरणीय स्रोतों पर स्विच करने को प्रोत्साहित करें।

संरक्षण पर पेंटिंग, वाद-विवाद और प्रश्नोत्तरी जैसी प्रतियोगिताओं में स्कूलों को शामिल करें।

ऊर्जा खपत को कम करने के लिए सार्वजनिक परिवहन, कारपूलिंग और साइकिलिंग को बढ़ावा दें।

ऊर्जा-कुशल नीतियों और कार्यक्रमों को लागू करने के लिए सरकारी एजेंसियों के साथ सहयोग करें।

संदेश को सोशल मीडिया, ब्लॉग और सामुदायिक आयोजनों के माध्यम से फैलाएं।

ऊर्जा के बारे में यह भी जाने :-

ऊर्जा विभिन्न वस्तुओं में पायी जाती है इसलिए ऊर्जा के विभिन्न स्वरूप हैं :-

●यांत्रिक ऊर्जा (Mechanical Energy)

●रासायनिक ऊर्जा (Chemical Energy)

●विद्युत ऊर्जा (Electrical Energy)

●नाभिकीय ऊर्जा (Nuclear Energy)

●ऊष्मीय ऊर्जा (Thermal Energy) आदि।

ऊर्जा के विभिन्न स्वरूपों को समग्र रूप से दो वर्गों में विभाजित किया जाता है :-

●गतिज ऊर्जा

●स्थितिज ऊर्जा

गतिज ऊर्जा-किसी वस्तु में उसकी या स्वयं की गति के कारण उत्पन्न होने वाली ऊर्जा को गतिज ऊर्जा (Kinetic energy) कहते हैं।

●चलती हवा में गतिज ऊर्जा विद्यमान होती है।

●घूमते पहिए में गतिज ऊर्जा विद्यमान होती है।

●बहते जल में गतिज ऊर्जा विद्यमान होती है।

●दौड़ती वाष्प में गतिज ऊर्जा विद्यमान होती है।

●चलती रेलगाड़ी में गतिज ऊर्जा विद्यमान होती है।

स्थितिज ऊर्जा-किसी वस्तु में अपनी स्थिति के कारण उत्पन्न ऊर्जा को स्थितिज ऊर्जा (Potential energy) कहते हैं।

●घड़ी में लिपटी हुई स्प्रिंग में स्थितिज ऊर्जा विद्यमान होती है।

●जमीन से उंचाई पर स्थित जल में स्थितिज ऊर्जा विद्यमान होती है।

●ओवरहेड टंकी में दबाई गई गैस में स्थितिज ऊर्जा विद्यमान होती है।

● किसी भी ऊंचाई पर रखी वस्तु में स्थितिज ऊर्जा विद्यमान होती है।

आज के दिन 14 दिसंबर का इतिहास में महत्व:-

◆ 1997 में 14 दिसंबर के दिन ही ग्रीनहाउस गैस के उत्सर्जन में कटौती के लिए विश्व के सभी देश सहमत हुए थे।

◆ 1921 में 14 दिसंबर के दिन ही एनी बेसेन्ट को बनारस हिंदू यूनिवर्सिटी ने 'डॉक्टर ऑफ लेटर्स' की उपाधि से विभूषित किया था।

◆ 1924 में आज ही के दिन भारतीय अभिनेता राज कपूर का जन्म हुआ था।

◆ 1971 में आज ही के दिन परमवीर चक्र सम्मानित भारतीय सैनिक और फ़्लाइंग ऑफ़िसर निर्मलजीत सिंह सेखों का निधन हुआ था।

◆ 1799 में आज ही के दिन अमेरिका के पहले राष्ट्रपति जॉर्ज वॉशिंगटन (प्रथम) का निधन हुआ था।

## World Energy Conservation Day 2023: 10 Easy Ways for Kids to Conserve Energy at Home, School

Thursday 14th December, 2023

World Energy Conservation Day, observed annually on December 14, serves as a reminder of the critical importance of preserving energy resources.

Energy conservation involves using less energy and minimising unnecessary waste. Simple practices like turning off electronic appliances when not in use contribute significantly to this effort. Instilling eco-friendly habits in children from a young age is crucial for a sustainable future. Here are 10 easy ways for kids to contribute to energy conservation both at home and school.

### 10 Ways To Conserve Energy

**Reduce Electronic Usage** Encourage your children to reduce their screen time. Turning off electronic devices when not in use not only saves electricity but also promotes a healthier lifestyle. Suggest engaging in outdoor activities or reading a book instead of spending excessive time in front of screens.

**Take a Shower Instead of a Bath** Encourage your children to opt for showers instead of baths, as showers typically use less water. Help them understand that by keeping their showers short, they can actively contribute to both water and energy conservation. It's a small but impactful way for them to play a part in caring for the environment.

**Switch-Off Appliances** Teach your kids to turn off lights, fans, and electronic devices when leaving a room. Make it a habit to switch off appliances completely, as standby mode still consumes energy. Consider using power strips for multiple devices in a room. This makes it easier to turn off multiple devices at once when they're not in use.

**Don't Leave the Fridge Door Open** Remind kids to close the refrigerator door promptly after use. Keeping the fridge closed helps maintain the desired temperature inside, reducing the energy required to cool it down again.

**Plant a Tree** Teach children about the crucial role trees play in maintaining ecological balance. Select a suitable location for planting a tree. It could be in your backyard, a community garden, or as part of a local environmental initiative. Explain to them about the proper care and maintenance of the tree.

**Walk to School** Walking or cycling to school provides an opportunity for kids to incorporate extra exercise into their daily routine. Explain the health benefits of regular physical activity. This approach also helps to diminish the volume of vehicles on the road and concurrently mitigate environmental pollution caused by cars.

**Use a Reusable Water Bottle** Help kids understand the environmental impact of single-use plastic by providing them with reusable water bottles. This reduces the need for manufacturing new plastic bottles and decreases the amount of waste in landfills.

**Recycle** Teach children about the importance of recycling. Set up designated bins for paper, plastic, and glass at home and encourage them to recycle at school. Explain how recycling helps conserve energy by reducing the need for the production of new materials.

**Classroom Jobs** In school, children can take an active role in energy conservation by asking their teachers about classroom jobs related to turning off lights, organizing recycling efforts, or

monitoring energy usage. This will make them responsible and will also foster a sense of ownership in preserving resources.

Layer Up Instead of relying solely on heating appliances in colder weather, encourage kids to layer up with warm clothing. This reduces the need for constant heating, thereby conserving energy.

## राष्ट्रीय ऊर्जा संरक्षण दिवस: एसआरएचयू जौलीग्रान्ट ने स्थापित की मिसाल, मिल चुका है ग्रीन प्रैक्टिसेस अवॉर्ड

Thursday 14th December, 2023

आज गुरुवार 14 दिसंबर को राष्ट्रीय ऊर्जा संरक्षण दिवस है। स्वामी राम हिमालयन विश्वविद्यालय (एसआरएचयू) की प्रायोजित संस्था हिमालयन इंस्टिट्यूट हॉस्पिटल ट्रस्ट (एचआईएचटी) स्वास्थ्य व शिक्षा की संगम स्थली के रूप में पहचान कायम कर चुका है। इसी कड़ी में एसआरएचयू ऊर्जा संरक्षण में भी योगदान कर राष्ट्र निर्माण में अग्रणी भूमिका निभा रहा है। (खबर जारी, अगले पैसे में देखिए)

एक रिपोर्ट के मुताबिक, वैश्विक कार्बन डाई ऑक्साइड उत्सर्जन महामारी के पूर्व के स्तर तक पहुंचने के करीब है। स्वामी राम हिमालयन विश्वविद्यालय (एसआरएचयू) जौलीग्रान्ट के कुलाधिपति डॉ. विजय धस्माना ने कहा कि इसका प्रमुख कारण है बड़े संस्थानों में बिजली की खपत में बेइंतहा वृद्धि। बिजली की खपत को कम करने के लिए सौर ऊर्जा सबसे बेहतरीन विकल्प है। सूर्य हमेशा से ऊर्जा का सबसे भरोसेमंद स्रोत रहा है। (खबर जारी, अगले पैसे में देखिए)

कुलाधिपति डॉ. विजय धस्माना ने बताया कि सौर ऊर्जा के महत्व को हम समझते हैं। इसके लिए संस्थान में विशेषज्ञों की एक समिति बनाई गई है। भविष्य की जरूरत को समझते हुए ऊर्जा संरक्षण की ओर हमने वर्ष 2007 में पहला कदम बढ़ाया था। तब हिमालयन हॉस्पिटल, कैंसर रिसर्च इंस्टिट्यूट सहित सभी हॉस्टल में सोलर वाटर हीटर पैनल लगाए गए थे। (खबर जारी, अगले पैसे में देखिए)

वर्ष 2017 में लगाया पहला 500 किलोवॉट रूफ टॉप सोलर पैनल

कुलाधिपति डॉ. विजय धस्माना ने बताया कि वर्ष 2017 में राष्ट्रीय सौर मिशन से जुड़ने का फैसला किया। हिमालयी राज्यों में रूफ टॉप सौर ऊर्जा उत्पादन के लिए सरकार की ओर से प्रदान की जा रही 70 फीसदी सब्सिडी को देखते हुए सोलर पैनल लगाने का फैसला लिया। नर्सिंग और मेडिकल कॉलेज में 500 किलोवॉट रूफ टॉप सोलर पैनल लगाए। (खबर जारी, अगले पैसे में देखिए) 6115332 किलोवॉट (यूनिट) बिजली की बचत

कुलाधिपति डॉ. विजय धस्माना ने बताया कि वर्ष 2017 से अब तक विश्वविद्यालय कैम्पस स्थित विभिन्न भवनों की छतों में 1500 किलोवॉट का सोलर पैनल लगाए जा चुके हैं। इससे अब तक एसआरएचयू 61,15,332 किलोवॉट (यूनिट) बिजली की बचत कर चुका है। (खबर जारी, अगले पैसे में देखिए)

सौर ऊर्जा के इस्तेमाल से पहाड़ों में पहुंचाया पानी

कुलाधिपति डॉ. विजय धस्माना ने बताया कि सौर ऊर्जा का इस्तेमाल हमने पहाड़ों के दुरस्थ गांवों में पानी पहुंचाने के लिए भी किया है। साल 2014 में टिहरी के चंबा में ग्राम चुरेड़धार में सोलर पंपिंग प्लांट के जरिये गांव में पानी पहुंचाया। इसकी मदद से 23 यूनिट बिजली रोजाना के हिसाब से गांव के करीब 43 हजार रुपये सलाना बचत हुई। (खबर जारी, अगले पैसे में देखिए)

करीब 1455 टन कार्बन उत्सर्जन की कमी

कुलाधिपति डॉ. विजय धस्माना ने कहा कि ग्लोबल वार्मिंग के खतरे दिखने लगे हैं। इसका बड़ा कारण है कार्बन उत्सर्जन। एसआरएचयू में 1500 किलोवॉट रूफ टॉप सोलर पैनल की मदद से 1455 टन कार्बन उत्सर्जन में कमी आई है। उत्तराखंड के किसी भी संस्थान की तुलना में यह एक रिकॉर्ड है। (खबर जारी, अगले पैसे में देखिए)

इलेक्ट्रिकल व मैकेनिकल इंजीनियरिंग विभाग प्रभारी गिरीश उनियाल ने बताया कि संस्थान में ऊर्जा मांग के अनुसार 3500 किलोवॉट का बिजली संयंत्र लगाया गया है। बीते तीन वर्षों में संस्थान अपनी बिजली की 16 फीसदी मांग सोलर पावर प्लांट से पूरा कर रहा है। (खबर जारी, अगले पैरे में देखिए)

सीआईआई से मिला ग्रीन प्रैक्टिसेस अवॉर्ड

कुलाधिपति डॉ. विजय धस्माना ने बताया कि संस्थान की इन तमाम उपलब्धियों के लिए हाल ही में भारतीय उद्योग परिसंघ (सीआईआई) ने विश्वविद्यालय को 'ग्रीन प्रैक्टिसेस अवॉर्ड' की सर्विस कैटेगरी में 'गोल्ड अवॉर्ड' से सम्मानित किया। इस कैटेगरी में उत्तर भारत का पहला व एकमात्र संस्थान होने का गौरव भी हासिल किया। है। (खबर जारी, अगले पैरे में देखिए)

सोलर पैनल को अपनाने की अपील

कुलाधिपति डॉ. विजय धस्माना ने कहा कि ऊर्जा संरक्षण के लिए सभी नागरिकों से सजग भूमिका निभानी होगी। आने वाले समय में ग्लोबल वार्मिंग से आम जनजीवन को बड़ा खतरा होने वाला है। इसलिए अभी से प्राकृतिक ऊर्जा पर निर्भर रहने की आदत डालनी होगी। प्रकृति के संरक्षण के लिए ऊर्जा का संरक्षण जरूरी है।

Awareness towards energy conservation is important. Tezzbuzz Something Different News  
Yogesh Kumar Goyal

The Bureau of Energy Efficiency, attached to the Ministry of Power, organizes 'National Energy Conservation Day' every year on 14 December to showcase the country's achievements in energy efficiency and conservation. The Bureau had implemented the Energy Conservation Act in the country in the year 2001. In fact, population across the world has increased rapidly in the last few decades and accordingly energy consumption is also continuously increasing. On the other hand, due to the rapid increase in energy demand, the possibility of destruction of traditional energy resources in the future is increasing. If this happens then the very existence of human civilization will be questioned. This is the reason that in order to save sources of energy for future use, the responsibility of developing other resources for its replacement has increased, paying special attention to energy conservation throughout the world.

National Energy Conservation Day is celebrated in the country to make people aware about the importance of reducing energy wastage, saving energy and conserving it. This day is celebrated every year with a special theme keeping in mind some goals and objectives to make them more effective among the people. In fact, the main objective of organizing this day is to motivate people to save energy for a happy future of humanity by minimizing unnecessary use of energy.

'National Energy Conservation Campaign' is a national awareness campaign launched by the Ministry of Power to facilitate the process of energy conservation in the country. Petroleum Conservation Research Association was formed by the Central Government in the year 1977 to promote energy conservation and efficiency in the country. Another organization 'Bureau of Energy Efficiency' was established in the year 2001 to increase awareness among the general public about the importance of energy efficiency and energy conservation. The Bureau says that every person can save energy by taking small steps by controlling unnecessary use of lights, fans, heaters, coolers, ACs and any other electrical equipment in his home or office.

In my book 'Pollution Free Breaths', I have mentioned in detail how even by taking steps for energy conservation at small level, every citizen can give a huge help in the national energy conservation campaign of the country and thus save a large amount of energy. Energy can be conserved. If some such small measures are mentioned then CFL or LED bulbs should be used in place of old bulbs. ISI Use only marked electrical appliances. As much as possible, sunlight should be used during the day and electrical appliances like lights, fans, coolers, ACs, heaters, geysers etc. should be switched off when not needed. Use of solar cookers instead of electrical appliances for cooking and use of solar water heaters instead of electric geysers for heating water should be promoted. If trees are planted around the plot at the time of construction, the building will be protected from overheating even in extreme heat and the need for coolers, ACs etc. will be reduced. By using light colors on the walls in houses or offices, even low light bulbs can provide adequate lighting in the room. With this, we will not only be helpful in saving energy for the

future by participating in the energy conservation campaign but will also be able to keep our electricity bills limited.

There should be arrangement of solar lights in public places. According to experts, working in natural light during day time at workplace increases the efficiency of the people and there is expected reduction in energy consumption, whereas working in places with bright artificial light causes stress, headache, blood pressure, fatigue among the workers. Health related problems are seen and their work efficiency is also negatively affected. Therefore, if there is adequate natural lighting in the office, it not only conserves energy but also increases the efficiency of the employees.

Thousands of gallons of water are wasted every year in the country, hence while talking about energy conservation, it is very important to pay adequate attention to preventing wastage of water. Not only India but the entire world faces limited natural resources to meet its critical energy needs like electricity, as well as serious challenges like environmental imbalance and displacement. To deal with such serious problems and challenges, renewable energy is a great option, which will prove to be effective in meeting the energy needs along with dealing with environmental problems, but whether the energy resources are non-renewable or renewable, we need to use them in our lives. Understanding the importance of energy, we have to be aware of energy conservation. It is the responsibility of every citizen of the country not to waste energy in whatever form it may be. For a happy future for ourselves and the coming generations, we must include energy conservation habits in our behavior.

## Why is National Energy Conservation Day Celebrated on December 14? History, Significance, and Quotes

Thursday 14th December, 2023

# NEWS FEEL

Source :NEWS18 NEWS World Energy Conservation Day is celebrated annually on December 14. (Image: Shutterstock)

National Energy Conservation Day aims to promote awareness regarding the value of energy conservation for current and future generations.

**NATIONAL ENERGY CONSERVATION DAY 2023:** Every year, December 14 is commemorated as National Energy Conservation Day. The day is marked to demonstrate how far nations have come in terms of energy conservation and efficiency. The day also aims to promote awareness regarding the value of energy conservation for current and future generations. It is vital to spend energy wisely in order to maximise an environmentally friendly livelihood.

The ultimate objective of energy conservation is to achieve sustainable energy usage, ensuring that current needs are met without compromising the ability of future generations to meet their own needs. It is distinct from the concept of 'energy efficiency,' which involves employing technologies and processes that require less energy to perform the same functions, optimising resource utilization.

### National Energy Conservation Day 2023: History

Since 1991, the National Energy Conservation Day has been organised by the Bureau of Energy Efficiency (BEE), which is part of the Union Ministry of Power. BEE contributes to the development and implementation of plans and programmes to decrease excessive energy consumption. Further, in 2001, the committee signed the Energy Conservation Act to evaluate various methods to lessen the impact of climate change through holistic development.

### National Energy Conservation Day 2023: Significance

The goal of National Energy Conservation Day is to raise public awareness about the necessity of energy efficiency and conservation. BEE recognises and encourages industry efforts to reduce energy use by bestowing National Energy Conservation Awards. Industry, buildings, transportation, institutions, and appliances are among the 17 industries and 5 categories recognised by the awards.

The annual energy conservation awards recognise innovation and achievements in energy conservation by industries and manufacturers, as well as raise awareness. They also play a significant role in India's response to global warming through energy savings. The awards also acknowledge their dedication to energy savings and efficiency. The plan has encouraged industry and other businesses to implement energy-saving solutions.

### National Energy Conservation Day 2023: Quotes

"Our dependence on fossil fuels amounts to global pyromania, and the only fire extinguisher we have at our disposal is renewable energy." – Hermann Scheer

"The truth is, as most of us know, that global warming is real and humans are major contributors, mainly because we wastefully burn fossil fuels." – David Suzuki

"Earth provides enough to satisfy every man's needs, but not every man's greed." – Mahatma Gandhi

“What we are doing to the forests of the world is but a mirror reflection of what we are doing to ourselves and to one another.” – Chris Maser

“Look deep into nature, and then you will understand everything better.” – Albert Einstein

## National Energy Conservation Day 2023: Date, Theme & History

Thursday 14th December, 2023

C

**President Draupadi Murmu** attended the NECD 2023 celebrations at Vigyan Bhawan, New Delhi, on 14 December 2023. On this occasion, President Murmu presented many awards in the field of energy conservation.

The awards presented include the following:

- National Energy Conservation Award 2023
- National Energy Efficiency Innovation Award 2023

The winners of the National Painting Competition 2023 on Energy Conservation were also honoured.

This competition is conducted at three levels i.e. school, state and national level.

## President Droupadi Murmu Presents “National Energy Conservation Awards – 2023”: SCR receives Seven Awards

Thursday 14th December, 2023

Awards were presented at a Function held at Vigyan Bhavan, New Delhi. The Hon'ble President of India, Smt Droupadi Murmu presented the National Energy Conservation Awards, National Energy Efficiency Innovation Awards and National Painting Competition prizes in New Delhi today i.e., December 14, 2023 on the occasion of National Energy Conservation Day. On this Occasion, South Central Railway was presented with seven National Energy Conservation Awards for the year 2023.

These awards were presented in a function held by the Bureau of Energy Efficiency under the aegis of Ministry of Power, Government of India at Vigyan Bhawan, New Delhi. Shri R. K. Singh, Hon'ble Union Minister of Power, New & Renewable Energy and Shri Krishan Pal, Hon'ble Minister of State for Power & Heavy Industries also graced the occasion. These awards are declared for the best energy management practices during the year 2023.

This year, as a part of National Energy Conservation Awards, the following Awards have been announced pertaining to the Zone –

Hyderabad Passenger Reservation System (PRS) Building has got the First prize in Government Offices Category

Wagon Depot, Vijayawada got the First prize in Railway Workshops Category

South Central Railway Zone got the Second prize in Zonal Railways Category

Lekha Bhavan (SCR Accounts Office Building) got the Second Prize in Government Offices Category

Renigunta Running Room got the Certificate of Merit in Government Offices Category

Guntakal Running Room got the Certificate of Merit in Government Offices Category

Divisional Railway Manager Office, Guntakal got the Certificate of Merit in Government Offices Category.

Shri Arun Kumar Jain, GM and DRM, BZA receiving prize for wagon depot

Shri Arun Kumar Jain, General Manager, SCR along with Shri Narendra A Patil, Divisional Railway Manager, Vijayawada Division received the first prize for Wagon Depot, Vijayawada, while Shri P.D. Mishra, Principal Chief Electrical Engineer, SCR and Shri Bhartesh Kumar Jain, Divisional Railway Manager, Secunderabad Division received the first prize for Hyderabad PRS Building. Other Senior Officers of South Central Railway received the awards for their respective Energy efficient units.

These Awards are being announced every year to recognize the efforts of various industrial units / establishments / organizations that have shown exemplary performance in conservation of energy and effective utilization of available energy. South Central Railway being at the forefront in Energy Conservation has been winning these awards from Union Ministry of Power for the past several years consistently. The Zone has been able to bag these awards through relentless efforts in the area of Energy Efficiency and Green Initiatives by all the Divisions, Workshops, Field units of all the departments, even with the tight competition from various Ministries, PSUs & Corporate sectors.

Shri Arun Kumar Jain, General, South Central Railway has expressed his satisfaction on representing the Zone for receiving these awards. He also congratulated the winners of National Energy Conservation awards and has stated that it is a proud moment for SCR to win 7 prestigious awards at National level. This reflects the commitment shown by each and every employee of the Zone. He complimented Principal Chief Electrical Engineer, SCR, Divisional Railway Managers, Vijayawada, Secunderabad & Hyderabad and other concerned Railway officials on this occasion.

Share New Delhi : The National Painting Competition on Energy Conservation 2023, the National Energy Efficiency Innovation Awards, and the

National Conservation Awards were presented to their winners today by President Droupadi Murmu at a ceremony in New Delhi. Raising awareness of energy efficiency and conservation is the goal of the National Energy Conservation Awards. National Energy Conservation Day was the reason behind the organisation of the event.

Speaking at the event, the president predicted that others will be motivated by the prizes given out for energy saving and efficiency. She emphasised the need of using cutting-edge technologies to raise awareness of energy conservation.

Speaking at the event, Union Minister of Power R K Singh claimed that India is now a global leader in the energy transition. Climate change and the energy transition, he noted, are significant global concerns. He stated that global efforts are needed to address the threat that climate change poses to the earth.

## National Energy Conservation Day: Vedanta Aluminium announces energy efficiency breakthrough via patented potlining technology

Thursday 14th December, 2023

# National Energy Conservation Day: Vedanta Aluminium announces energy efficiency breakthrough via patented potlining technology

🕒 7 days ago

TBB BUREAU

NEW DELHI, DEC 14, 2023

On National Energy Conservation Day, Vedanta Aluminium, the largest aluminium producer in India, announces a significant new breakthrough in the lining design of the 'pots' at its aluminium smelters. The smelters house several potlines, which are long buildings within the smelter that contain a series of 'pots' or large electrolytic cells, within which aluminium production via smelting is carried out.

The 'Vedanta Lining Design' is a patented, energy efficient technique that provides the dual advantages of increased energy efficiency and enhanced lifespan of the smelting pots, reducing energy consumption by 200 to 250KWh per tonne of aluminium produced.

The innovation has also been recognised by the Power Ministry's Bureau of Energy Efficiency (BEE) as part of its National Energy Efficiency Innovation Awards (NEEIA) 2023, in the presence of the President of India, Droupadi Murmu.

On the occasion of National Energy Conservation Day, this prestigious recognition comes as a strong reaffirmation of the company's commitment to championing energy efficiency and conservation through transformative innovations within the global aluminium industry. Its initiatives in this regard also closely align with the UN Sustainable Development Goals of Industry, Innovation & Infrastructure (SDG9) <https://thebusinessbytes.com/odisha/national-energy-conservation-day-vedanta-aluminium-announces-energy-efficiency-breakthrough-via-patented-potlining-technology/>

## HARYANA BAGS SECOND PRIZE IN THE NATIONAL ENERGY CONSERVATION AWARDS 2023

December 14, 2023 08:50 PM

ENERGY MINISTER RECEIVES AWARD FROM THE PRESIDENT AT A CEREMONY HELD AT DELHI

Face2News/Chandigarh

Haryana was adjudged second best State under the Best Performing State Designated Agency category (Group 1) in the 33rd National Energy Conservation Awards 2023 held at Delhi.

Energy Minister, Sh. Ranjit Singh received the award from President of India, Smt Droupadi Murmu in a function organised by the Union Ministry of Power at Vigyan Bhawan today which was also attended by Union Power Minister, Sh. R.K.Singh, Director General, Department of New & Renewable Energy & HAREDA, Haryana, Sh. S. Narayanan and many other Central Ministers and dignitaries. The awards were presented during the National Energy Conservation Award (NECA) function.

Sh. Ranjit Singh, while appraising this achievement informed that the Haryana Government is promoting energy conservation in the State with multipronged strategy consisting of Policy, Regulation, Demonstration and Incentives.

He said that the State Government has taken various policy initiatives including mandating...

## President Droupadi Murmu emphasizes need to adopt innovative technology for energy conservation

Thursday 14th December, 2023

President Droupadi Murmu today felicitated the winners of the National Energy Conservation Awards, National Energy Efficiency Innovation Awards, and National Painting Competition on Energy Conservation 2023 at a function in New Delhi. National Energy Conservation Awards aims at raising awareness about energy efficiency and its conservation. The function was organized on the occasion of National Energy Conservation Day.

Speaking on the occasion, the President said that the awards given towards energy efficiency and conservation will inspire others. She stressed the need to create awareness for energy conservation by adopting innovative technology.

Speaking on the occasion, Union Minister of Power R K Singh said that India has emerged as one of the leaders in energy transition in the world. He said, energy transition and climate change are important issues for the world. He said, climate change is posing a threat to planet and collective efforts are required to combat the challenge.

### SCR's Wagon Depot of Vijayawada Division awarded First prize in National Energy Conservation Awards 2023

Thursday 14th December, 2023

(\* Powered By Similar Web and Opoint)

Wagon Depot of Vijayawada Division, South Central Railway (SCR) has been awarded First prize in National Energy Conservation Awards – 2023 in Railway

Workshops Sector on the occasion of National Energy Conservation Day. Arun Kumar Jain, General Manager, SCR along with Narendra A Patil, Divisional Railway Manager, Vijayawada Division received the award from President Droupadi Murmu today.

These awards were presented in a function held by the Bureau of Energy Efficiency under the aegis of Ministry of Power, Government of India at Vigyan Bhawan, New Delhi. R. K. Singh, Union Minister of Power, New & Renewable Energy and Krishan Pal, Minister of State for Power & Heavy Industries also graced the occasion. These awards are declared for the best energy management practices to encourage energy saving, help reduce carbon footprint, and bring down the energy intensity in the country.

Wagon Depot, Vijayawada is one of the Major sheds on South Central Railways for attending to all types of sick wagons and also for Routine Overhauling (ROH) of different wagons. The Area Training Centre in ROH Depot imparts training to newly recruited staff of Vijayawada and Guntur Divisions, in addition to staff of other departments like Operations and Engineering. Wagon Depot, Vijayawada adopted various Energy Conservation measures in recent times to reduce energy consumption.

## President of India, Smt Droupadi Murmu presented the National Energy Conservation Awards 2023

Thursday 14th December, 2023

The President of India, Smt Droupadi Murmu presented the National Energy Conservation Awards 2023 and National Painting Competition on Energy Conservation prizes in New Delhi today (December 14, 2023) on the occasion of National Energy Conservation Day.

Addressing the gathering, the President said that the health and happiness of all of us lies in the conservation and good health of nature. If we make optimal utilization of the available resources, everyone's energy and other needs will be fulfilled without unnecessary pressure on nature and Mother Earth. She stated that along with optimal utilization, all stakeholders will have to promote energy efficiency and innovation. Energy saving measures have to be used on a large scale. She highlighted that energy saving is energy production – this message is very useful. She urged all to make every possible effort to spread this message.

The President said that in the 21st century, the world community will have to remain continuously active in enhancing energy efficiency and increasing the use of renewable energy. We have to increase the production of energy from wind, solar and small and micro hydro projects. Apart from using more renewable energy, we also have to make efforts to produce more energy from less resources. She added that we should move forward with the concept of a triple bottom line in our sustainability efforts. Any business should not only have economic benefits but also have environmental and social benefits.

The President said that India has always worked as a responsible country in the field of clean energy. But we have also been making it clear from time to time that the dependence on fossil fuel is definitely decreasing but fossil fuel based energy is also essential in our country. India is

promoting clean coal technologies so that the processes of coal extraction and use become more efficient and environment friendly. It is the result of our commitment towards the environment that India has moved from 30th to 7th place in the ranking of Climate Change Performance Index in a period of ten years.

The President said that efforts like 'Green Energy Open Access Rules, 2022' and Renewable purchase obligations will also play an important role in India's journey to achieve the target of Nationally Determined Contributions by the year 2030. She stated that in line with 'LiFE' i.e. Lifestyle for Environment, India has now taken the initiative of "Green credit" which encourages environmental protection practices related to our traditions. She expressed confidence that these efforts will prove important in achieving our clean energy and environment goals.

The National Energy Conservation Day is celebrated on December 14 every year, in order to spread the message on the importance of conserving energy and to showcase the achievements of the nation in energy efficiency and conservation.

New Delhi [India], December 15 (ANI): President Droupadi Murmu presented the National Energy Conservation Awards 2023 in New Delhi on the occasion of National Energy Conservation Day.

Addressing the gathering, the President said that the health and happiness of all of us lies in the conservation and good health of nature.

“If we make optimal utilization of the available resources, everyone's energy and other needs will be fulfilled without unnecessary pressure on nature and Mother Earth,” she said.

Speaking at the event, Droupadi Murmu said that the world should actively enhance energy efficiency and increase the use of renewable energy.

“In the 21st century, the world community will have to remain continuously active in enhancing energy efficiency and increasing the use of renewable energy. We have to increase the production of energy from wind, solar and small and micro hydro projects,” President Murmu said.

Murmu also laid stress on producing more energy from fewer resources and the concept of the triple bottom line in sustainability efforts.

“Apart from using more renewable energy, we also have to make efforts to produce more energy from less resources. We should move forward with the concept of a triple bottom line in

our sustainability efforts. Any business should not only have economic benefits but also have environmental and social benefits,” she said.

The President said that India has always worked as a responsible country in the field of clean energy.

“But we have also been making it clear from time to time that the dependence on fossil fuel is decreasing but fossil fuel-based energy is also essential in our country. India is promoting clean coal technologies so that the processes of coal extraction and use become more efficient and environment friendly. It is the result of our commitment towards the environment that India has moved from 30th to 7th place in the ranking of Climate Change Performance Index in a period of ten years,” she added.

The President said that efforts like ‘Green Energy Open Access Rules, 2022’ and Renewable purchase obligations will also play an important role in India’s journey to achieve the target of Nationally Determined Contributions by the year 2030.

She stated that in line with ‘LiFE’ i.e. Lifestyle for Environment, India has now taken the initiative of “Green credit” which encourages environmental protection practices related to our traditions. She expressed confidence that these efforts will prove important in achieving our clean energy and environment goals.

The National Energy Conservation Day is celebrated on December 14 every year, to spread the message of the importance of conserving energy and to showcase the achievements of the nation in energy efficiency and conservation. (ANI)

## President Droupadi Murmu presents National Energy Conservation Awards 2023

Friday 15th December, 2023

National Energy Conservation Day is observed in India every year on December 14, to raise public awareness about the value of energy efficiency and conservation.

Every year, the Bureau of Energy Efficiency under the Ministry of Power spearheads the celebrations. It is necessary to consume energy wisely and efficiently to maximise energy efficiency and to ensure that it is conserved for future generations. Since 1991, December 14 has been designated as the National Energy Conservation Day.

The purpose of this day is to showcase the achievements of the nation in energy efficiency and conservation.

Friday 15th December, 2023

# INDIA GAZETTE

First published in 1780

New Delhi [India], December 15 : President Droupadi Murmu presented the National Energy Conservation Awards 2023 in New Delhi on the occasion of National Energy Conservation Day.

Addressing the gathering, the President said that the health and happiness of all of us lies in the conservation and good health of nature.

"If we make optimal utilization of the available resources, everyone's energy and other needs will be fulfilled without unnecessary pressure on nature and Mother Earth," she said.

Speaking at the event, Droupadi Murmu said that the world should actively enhance energy efficiency and increase the use of renewable energy.

"In the 21st century, the world community will have to remain continuously active in enhancing energy efficiency and increasing the use of renewable energy. We have to increase the production of energy from wind, solar and small and micro hydro projects," President Murmu said.

Murmu also laid stress on producing more energy from fewer resources and the concept of the triple bottom line in sustainability efforts.

"Apart from using more renewable energy, we also have to make efforts to produce more energy from less resources. We should move forward with the concept of a triple bottom line in our sustainability efforts. Any business should not only have economic benefits but also have environmental and social benefits," she said.

The President said that India has always worked as a responsible country in the field of clean energy.

"But we have also been making it clear from time to time that the dependence on fossil fuel is decreasing but fossil fuel-based energy is also essential in our country. India is promoting clean coal technologies so that the processes of coal extraction and use become more efficient and environment friendly. It is the result of our commitment towards the environment that India has moved from 30th to 7th place in the ranking of Climate Change Performance Index in a period of ten years," she added.

The President said that efforts like 'Green Energy Open Access Rules, 2022' and Renewable purchase obligations will also play an important role in India's journey to achieve the target of Nationally Determined Contributions by the year 2030.

She stated that in line with 'LiFE' i.e. Lifestyle for Environment, India has now taken the initiative of "Green credit" which encourages environmental protection practices related to our traditions. She expressed confidence that these efforts will prove important in achieving our clean energy and environment goals.

The National Energy Conservation Day is celebrated on December 14 every year, to spread the message of the importance of conserving energy and to showcase the achievements of the nation in energy efficiency and conservation.

**Meghalaya receives accolade for state energy efficiency performance at NECA**

**SHILLONG:**

Meghalaya has clinched the second prize in the State Energy Efficiency Performance Award (Group 4) at the National Energy Conservation Awards (NECA) 2023.

The acknowledgment comes in recognition of the state's performance in the State Energy Efficiency Index. The award ceremony took place at Vigyan Bhawan, New Delhi, in the presence of The President of India, Droupadi Murmu.

NECA, an annual event observed on "National Energy Conservation Day," acknowledges commendable efforts in energy conservation across various sectors of the economy. Organised by the Bureau of Energy Efficiency (BEE), under the Ministry of Power, Government of India, NECA aims to regulate and promote energy efficiency and conservation in India.

Expressing jubilation, Abu Taher Mondal, Minister of the Department of Power, Government of Meghalaya, said, "The State Energy Efficiency Performance Award reflects our commitment to sustainable practices and energy conservation, motivating us to persist in our endeavors towards a greener and more energy-efficient future."

He highlighted Meghalaya's recent initiatives, including the Rs. 500 crore Solar Mission and the commissioning of a 33/11kv, 1x2.5MVA substation at Krang village.

Meghalaya, heavily reliant on hydro power, has been a leader in green power generation. Plans for solar parks at Suchen and Thamar with a capacity of 20 MW each are underway.

The distribution losses in MePDCL reduced from 25% in the financial year 2021–2022 to 16% in 2022–2023. Efforts to enhance billing efficiency and the consideration of the draft Energy Conservation Building Code (ECBC) are ongoing.

Sanjay Goyal, Commissioner and Secretary, Power Department, Govt. Of Meghalaya, remarked, “This recognition is a testament to our unwavering commitment to fostering a sustainable and resilient power infrastructure.”

Additionally, the Meghalaya Energy Conservation Regulation-2017 has been notified to promote the use of BEE Star level appliances in public procurement.

The Government has also launched The Meghalaya Electric Vehicle Policy 2021, aiming for 15% of the state’s vehicles to be electric by 2025, offering purchase incentives for early adoption of EVs based on the energy capacity of the battery.

### Chandigarh again grabs first position in Energy Conservation Index

President Draupadi Murmu presents the award to Dr Vijay Namdeorao Zade, Secretary, Finance and Engineering, UT of Chandigarh, in New Delhi on Thursday.

Advertisement

### [Tribune News Service](#)

#### **Chandigarh, December 14**

The Chandigarh Administration has achieved yet another significant milestone by securing first prize (Group 4 category) in the State Energy Efficiency Index for the second year in a row.

The State Energy Efficiency Index (SEEI) is a measurement tool used to assess and compare the annual energy efficiency performance of different states/UTs within the country. The index is developed by the Bureau of Energy Efficiency (BEE) in collaboration with the Alliance for an Energy Efficient Economy (AEEE).

Powered By

Every Year, BEE organises National Energy Conservation Awards function in New Delhi to felicitate the winners selected by the award committee under the Ministry of Power, Government of India, on the eve of National Energy Conservation Day celebrated on December 14 worldwide.

This year, President Draupadi Murmu graced the award function as chief guest held at Vigyan Bhawan, New Delhi, today and presented the award to Dr Vijay Namdeorao Zade, Secretary,

Finance/Engineering, UT, and CB Ojha, Chief Engineer, Engineering Department, for securing first position in the index.

Annually, BEE divides all states/UTs into four categories based on their total final energy consumption.

Ultimately, the overarching goal of the SEEI is to drive a shift towards a more sustainable and efficient energy landscape. It is aimed at harnessing the collective effort of states towards optimising energy consumption, reducing waste, promoting renewable energy adoption and mitigating environmental impacts, and contributing to a more resilient and environmentally conscious society.

**Factors assessed**

The State Energy Efficiency Index (SEEI) assesses various factors, including energy consumption patterns, energy production, energy-saving policies and initiatives, renewable energy usage, infrastructure and overall energy efficiency practices within a given state, specifically in building, industry, transport, municipal and cross sector.

## Murmu Leads Energy Conservation Day Festivities

13 Dec 2023 CW Team

President Droupadi Murmu will preside over the National Energy Conservation Day celebrations and award ceremony on Thursday, December 14th.

The event will see the President felicitating winners of the National Energy Conservation Awards, National Energy Efficiency Innovation Awards, and National Painting Competition on Energy Conservation, recognizing their achievements in promoting energy efficiency.

Observed annually on December 14th, National Energy Conservation Day aims to raise awareness about the importance of energy conservation and showcase India's progress in energy efficiency and conservation.

President Murmu will address the gathering and present awards to deserving individuals and organizations. Power and New & Renewable Energy Minister RK Singh and Minister of State for Power and Heavy Industries Krishan Pal will also grace the occasion.

The Bureau of Energy Efficiency, under the Ministry of Power, organizes the National Energy Conservation Day celebrations and awards to encourage and promote energy efficiency initiatives across India.

**ANY BUSINESS SHOULD NOT ONLY HAVE ECONOMIC BENEFITS BUT ALSO HAVE ENVIRONMENTAL AND SOCIAL BENEFITS: PRESIDENT MURMU**

**New Delhi, Dec 15:** The President of India, Droupadi Murmu presented the National Energy Conservation Awards 2023 and National Painting Competition on Energy Conservation prizes in New Delhi today (December 14, 2023) on the occasion of National Energy Conservation Day.

Addressing the gathering, the President said that the health and happiness of all of us lies in the conservation and good health of nature. If we make optimal utilization of the available resources, everyone's energy and other needs will be fulfilled without unnecessary pressure on nature and Mother Earth. She stated that along with optimal utilization, all stakeholders will have to promote energy efficiency and innovation. Energy saving measures have to be used on a large scale. She highlighted that energy saving is energy production – this message is very useful. She urged all to make every possible effort to spread this message.

The President said that in the 21<sup>st</sup> century, the world community will have to remain continuously active in enhancing energy efficiency and increasing the use of renewable energy. We have to increase the production of energy from wind, solar and small and micro hydro projects. Apart from using more renewable energy, we also have to make efforts to produce more energy from less resources. She added that we should move forward with the concept of a triple bottom line in our sustainability efforts. Any business should not only have economic benefits but also have environmental and social benefits.

The President said that India has always worked as a responsible country in the field of clean energy. But we have also been making it clear from time to time that the dependence on fossil fuel is definitely decreasing but fossil fuel based energy is also essential in our country. India is promoting clean coal technologies so that the processes of coal extraction and use become more efficient and environment friendly. It is the result of our commitment towards the environment that India has moved from 30th to 7th place in the ranking of Climate Change Performance Index in a period of ten years.

The President said that efforts like 'Green Energy Open Access Rules, 2022' and Renewable purchase obligations will also play an important role in India's journey to achieve the target of Nationally Determined Contributions by the year 2030. She stated that in line with 'LiFE' i.e. Lifestyle for Environment, India has now taken the initiative of "Green credit" which encourages environmental protection practices related to our traditions. She expressed confidence that these efforts will prove important in achieving our clean energy and environment goals.

The National Energy Conservation Day is celebrated on December 14 every year, in order to spread the message on the importance of conserving energy and to showcase the achievements of the nation in energy efficiency and conservation.

Awards were presented at a Function held at Vigyan Bhavan, New Delhi. The Hon'ble President of India, Smt Droupadi Murmu presented the National Energy Conservation Awards, National Energy Efficiency Innovation Awards and National Painting Competition prizes in New Delhi today i.e., December 14, 2023 on the occasion of National Energy Conservation Day. On this Occasion, South Central Railway was presented with seven National Energy Conservation Awards for the year 2023.

These awards were presented in a function held by the Bureau of Energy Efficiency under the aegis of Ministry of Power, Government of India at Vigyan Bhawan, New Delhi. Shri R. K. Singh, Hon'ble Union Minister of Power, New & Renewable Energy and Shri Krishan Pal, Hon'ble Minister of State for Power & Heavy Industries also graced the occasion. These awards are declared for the best energy management practices during the year 2023.

**This year, as a part of National Energy Conservation Awards, the following Awards have been announced pertaining to the Zone –\**

1. Hyderabad Passenger Reservation System (PRS) Building has got the **First prize** in Government Offices Category
2. Wagon Depot, Vijayawada got the **First prize** in Railway Workshops Category
3. South Central Railway Zone got the **Second prize** in Zonal Railways Category
4. Lekha Bhavan (SCR Accounts Office Building) got the **Second Prize** in Government Offices Category
5. Renigunta Running Room got the **Certificate of Merit** in Government Offices Category
6. Guntakal Running Room got the **Certificate of Merit** in Government Offices Category
7. Divisional Railway Manager Office, Guntakal got the **Certificate of Merit** in Government Offices Category.

Shri Arun Kumar Jain, GM and DRM, BZA receiving prize for wagon depot

Shri Arun Kumar Jain, General Manager, SCR along with Shri Narendra A Patil, Divisional Railway Manager, Vijayawada Division received the first prize for Wagon Depot, Vijayawada, while Shri P.D. Mishra, Principal Chief Electrical Engineer, SCR and Shri Bhartesh Kumar Jain, Divisional Railway Manager, Secunderabad Division received the first prize for Hyderabad PRS Building. Other Senior Officers of South Central Railway received the awards for their respective Energy efficient units.

These Awards are being announced every year to recognize the efforts of various industrial units / establishments / organizations that have shown exemplary performance in conservation of energy and effective utilization of available energy. South Central Railway being at the forefront in Energy Conservation has been winning these awards from Union Ministry of Power for the past several years consistently. The Zone has been able to bag these awards through relentless efforts in the area of Energy Efficiency and Green Initiatives by all the Divisions, Workshops, Field units of all the departments, even with the tight competition from various Ministries, PSUs & Corporate sectors.

Shri Arun Kumar Jain, General, South Central Railway has expressed his satisfaction on representing the Zone for receiving these awards. He also congratulated the winners of National Energy Conservation awards and has stated that it is a proud moment for SCR to win 7 prestigious awards at National level. This reflects the commitment shown by each and every employee of the Zone. He complimented Principal Chief Electrical Engineer, SCR, Divisional Railway Managers, Vijayawada, Secunderabad & Hyderabad and other concerned Railway officials on this occasion.

## National Energy Conservation Day 2023: Fostering Sustainable Practices and Innovations

*The spotlight of this significant day is undeniably on the esteemed National Energy Conservation Awards, presented by the Ministry of Power's Bureau of Energy Efficiency.*

*December 14, 2023. By Abha Rustagi*

<https://www.energetica-india.net/news/national-energy-conservation-day-2023-fostering-sustainable-practices-and-innovations>

ऊर्जा संरक्षण के महत्व पर संदेश फैलाने और ऊर्जा दक्षता एवं संरक्षण में राष्ट्र की उपलब्धियों को प्रदर्शित करने के लिए हर साल 14 दिसंबर को राष्ट्रीय ऊर्जा संरक्षण दिवस सेलिब्रेट किया जाता है। राष्ट्रपति श्रीमती द्रौपदी मुर्मु 14 दिसंबर, 2023 को नई दिल्ली के विज्ञान भवन, में आयोजित होने वाले राष्ट्रीय ऊर्जा संरक्षण दिवस 2023 समारोह में भाग लेने वाली है। इस मौके पर, राष्ट्रपति उपस्थित जनसमूह को संबोधित करने वाली है और राष्ट्रीय ऊर्जा संरक्षण पुरस्कार 2023, राष्ट्रीय ऊर्जा दक्षता नवोन्मेषण पुरस्कार 2023 और ऊर्जा संरक्षण पर राष्ट्रीय चित्रकला प्रतियोगिता 2023 के विजेताओं को सम्मानित भी करने वाले है।

राष्ट्रीय ऊर्जा संरक्षण दिवस और पुरस्कारों का आयोजन भारत सरकार के विद्युत मंत्रालय के अंतर्गत ऊर्जा दक्षता ब्यूरो (बीईई), जो भारत में राष्ट्रीय ऊर्जा दक्षता और इसके संरक्षण को विनियमित करने और बढ़ावा देने के लिए ऊर्जा संरक्षण अधिनियम 2001 के अनुसार अधिदेशित की गई है। बता दें कि केंद्रीय विद्युत और नवीन एवं नवीकरणीय ऊर्जा मंत्री श्री आरके सिंह इस मौके पर संबोधित करने वाले है। केंद्रीय विद्युत और भारी उद्योग राज्य मंत्री श्री कृष्ण पाल और विद्युत मंत्रालय के सचिव श्री पंकज अग्रवाल भी उपस्थित रहेंगे।

### राष्ट्रीय ऊर्जा संरक्षण पुरस्कार 2023

बता दें कि ऊर्जा मंत्रालय के मार्गदर्शन में बीईई ऊर्जा दक्षता और इसके संरक्षण के बारे में जागरूकता बढ़ाने के लिए राष्ट्रीय ऊर्जा संरक्षण दिवस के खास मौके पर ऊर्जा संरक्षण पुरस्कारों से सम्मानित करने के द्वारा ऊर्जा उपभोग को कम करने में औद्योगिक इकाइयों, संस्थानों और प्रतिष्ठानों के प्रयासों को स्वीकार करता है और उन्हें प्रोत्साहित कर रहा है। एनईसीए 2023 के लिए आवेदन 9 नवंबर, 2023 तक खुले थे और कुल 516 आवेदन प्राप्त हुए थे। जिनमे से 20 प्रथम पुरस्कार, 16 द्वितीय पुरस्कार और 27 मान्यता प्रमाणपत्र सहित कुल 63 पुरस्कार प्रदान भी किया जा रहा है।

### राष्ट्रीय ऊर्जा दक्षता नवोन्मेषण पुरस्कार (एनईईआईए) 2023

ऊर्जा दक्षता के क्षेत्र में भारत के उत्कृष्ट कार्यों और नवोन्मेषी विचारों को सम्मानित करने के लिए NEEIA की शुरुआत वर्ष 2021 में की गई थी। NEEIA 2023 के लिए विभिन्न श्रेणियों अर्थात् श्रेणी क: उद्योग, भवन और परिवहन तथा श्रेणी ख: छात्र और रिसर्च स्कॉलर ऑनलाइन आवेदन आमंत्रित भी किया जा चुके है। पुरस्कारों का प्रत्यांकन पत्रिके, समापन विधायीयता, ऊर्जा बचत

## Fossil fuel-based energy also essential for India President

PTI | Updated: December 14, 2023 22:18 IST

New Delhi, Dec 14 (PTI) President Droupadi Murmu on Thursday said the dependence on fossil fuels is definitely decreasing, but fossil fuel-based energy is also essential for India.

India has always worked as a responsible country in the field of clean energy, Murmu said, addressing the National Energy Conservation Awards 2023 function here.

"But we have also been making it clear from time to time that the dependence on fossil fuel is definitely decreasing but fossil fuel-based energy is also essential in our country," she stated.

India is promoting clean coal technologies so that the processes of coal extraction and use become more efficient and environment friendly, she noted.

It is the result of our commitment towards the environment that India has moved from 30th to 7th place in the ranking of the Climate Change Performance Index in a period of ten years, she said.

Hon'ble President of India presents NECA Awards for IndianOil's Guwahati & Haldia Refinery  
On National Energy Conservation Day, Hon'ble President of India, Shri Droupadi Murmu, presented the IndianOil National Energy Conservation Awards (NECA) to Mr. Shrikant Mashav Vaidya, Chairman, and Ms. Sakia Misra, Director (Refineries), IndianOil. Shri R.K. Singh Union Minister for Power and New & Renewable Energy, Shri Koushan Pal Union Minister of State for Power and Heavy Industries were part of the galaxy of dignitaries present on the occasion at the award function held at Vigyan Bhawan. IndianOil has bagged the First Prize in Petroleum Refining Sector for Guwahati Refinery and Certificate of Merit in Petroleum Refining Sector for Haldia Refinery. The honour recognises these refineries for making significant improvement in specific energy consumption by undertaking innovative sustainable practices for energy saving. The Ministry of Power, Government of India, recognizes the exemplary efforts on Energy Conservation in the country made by organizations every year, including special efforts to achieve the goal of Nationally Determined Contributions by recognizing them with National Awards.

## MG Motor India honoured with National Energy Conservation Award 2023

EOI CORRESPONDENT

**GURUGRAM, DEC 19/-**/MG (Morris Garages), a British automobile brand with a 100-year-old legacy, announced that its Halol plant in Gujarat was honoured with the second prize for the NECA (National Energy Conservation Award) 2023 for 'excellence in the field of energy efficiency' in the Automobile sector by government of India. The award was presented by the Honble President of India, Smt. Droupadi Murmu and Shri R.K. Singh, Minister of Power and New and Renewable Energy at a ceremony held at Vigyan Bhawan, New Delhi on December 14, 2023. From MG Motor India, Rajeev Chaba, CEO-Emeritus and Biju Balendran, Deputy Managing Director, received the award on behalf of

the company, sources informed.

The most prestigious award in the field of energy conservation, which is driven by the Ministry of Power and the Bureau of Energy Efficiency (BEE) comes on the back of a rigorous evaluation process. Through both off-site and on-site assessment by the Bureau's technical team to understand the energy conservation measures implemented by MG Motor India at its manufacturing plant and their benefits in terms of energy savings, MG Motor India is today one of the few pioneering passenger carmakers to embrace green manufacturing practices at its manufacturing plant with 50% of the energy required for manufacturing operations is from renewable resources. MG Motor India's pledge to reduce CO2 emissions by nearly 2 lakh MT over the course of 15 years is equivalent to the positive environmental impact of planting over 13 lakh trees, sources said.

The brand has already witnessed a remarkable 36% decrease in COG emissions, with levels dropping from 0.50 MT in 2022 to 0.34 MT till Nov 2023. Projections indicate that this downward trend will continue, with an estimated carbon footprint reduction of 11889 MT by the end of this year, sources also said.

Read more At:

<https://www.aninews.in/news/national/general-news/union-minister-rk-singh-emphasises-reducing-emissions-as-per-cop28-targets-43pc-reduction-by-203020231214234043/>

- **India's Power Minister RK Singh stated that the manufacturing capacity for battery storage was just 7-10 GW. India later started working on this neglected domain and announced Viability Gap Funding (VGF).**

India's Minister for Power and New & Renewable Energy — RK Singh — in an conversation with **CNBC-TV18** termed reduction in carbon emissions as the end objective in combating global warming. His statement comes as he describes the carbon reduction target as the major takeaway from the recently concluded COP-28 meeting in the UAE.

The Minister sounding confident pointed out that the country will be ahead of the curve if it achieves its pledge to cut 45% emissions by 2030. The global COP-28 targets remain reduction by 43% carbon emissions by 2030 and 60% emissions by 2040.

Singh also hit out at criticism of India's thermal capacity addition.

<https://www.cnbc18.com/environment/india-carbon-reduction-focus-on-battery-storage-for-net-zero-goal-power-minister-rk-singh-18573381.htm/amp>

- **Talking only about coal, fossil fuels is diversionary tactic of developed nations: RK Singh on COP28**

*The Union minister said even though India decided to add 80 GW of coal-fired capacity by 2030, the country's total thermal capacity will come down from nearly 70% in 2014 to about 33% in 2030, which will be one of the largest reductions by any country.*

"India's energy transition is according to national circumstances," Union Minister for Power and New and Renewable Energy RK Singh said on December 14 while justifying the country's need to add more coal-fired power generation capacity in the coming years.

When asked about the recently concluded COP28 in Dubai, Singh said India's submission was to keep the focus on emissions. "India emits 2.1 tonnes per capita, while developed nations emit 22 tonnes per capita. What needs to be reduced is the emissions. It doesn't matter if the emissions are coming from coal or petroleum. We should talk about overall emissions," he said.

<https://www.moneycontrol.com/news/business/talking-only-about-fossil-fuels-and-not-about-emissions-is-diversionary-tactic-of-developed-nations-rk-singh-on-cop28-11906801.html/amp>

The screenshot shows a news article from ET EnergyWorld.com. The headline is "India to slash coal power capacity to 33% by 2030: Minister RK Singh". The article text states: "When asked about the recently concluded COP28 in Dubai, he pointed to emission reduction as a priority and noted, 'Our transition is according to national circumstances. The developed countries emit more carbon and don't want to address that.'" Below the text are social media sharing icons for Twitter, WhatsApp, LinkedIn, Facebook, and Email. The author is Saurav Anand, ET EnergyWorld, with a note "Updated On Dec 15, 2023 at 08:09 AM IST". The article has been read by 1583 Industry Professionals. A photo of Union Minister RK Singh speaking at a podium is visible at the bottom of the article snippet.

Union Minister for Power and New and Renewable Energy, RK Singh, on Thursday emphasised the need for a 43 per cent reduction in emissions intensity by 2030, recognising emissions as a primary driver of global warming. While highlighting the crucial discussions held during the recently concluded COP28, Singh underscored that per capita emissions in India are among the lowest globally.

[Click here to follow our WhatsApp channel](#)

"COP 28 has just concluded and one of the important points discussed was emission...Emissions intensity should be reduced by 43 percent by 2030...This is the main point because emissions are the main reason for global warming...Our per capita emission is one of the lowest in the world," Singh said.

Advertisement

COP28 was the 28th annual United Nations (UN) climate meeting, held in Dubai, in the United Arab Emirates (UAE) from November 30 to December 12, but overrun by a day.

COP stands for "Conference of the Parties", where the "parties" are the countries that signed up to the original UN climate agreement in 1992.

For the first time, countries agreed on the need to "transition away from fossil fuels in energy systems".

UK Prime Minister Rishi Sunak, German Chancellor Olaf Scholz, French President Emmanuel Macron, and Indian Prime Minister Narendra Modi were among the world leaders to attend the beginning of the summit.

# Share of coal-based power to fall to 23% by 2030: Minister

Work on to add 24K MW of hydro capacity, he says

**FE BUREAU**  
New Delhi, December 14

**EVEN AFTER THE** country adds 80 GW of thermal capacity by 2030, the share of coal-based power in installed capacity will come down to 23% by then from 68% in 2014, Union power minister R K Singh said on Thursday while talking about the final deal adopted at the recently concluded COP28 summit.

"The transition is according to national circumstances. Our per capita consumption is the lowest in the world. What needs to be reduced is the emissions," Singh said, adding that it is the developed countries who are emitting more carbon and don't want to address that.

The government aims to add 80 GW of thermal capacity by 2030 in order to meet the rising power demand while working towards tripling its renewable energy capacity to 500 GW in the same timeline.

"It (coal-based power) will again be one of the largest reductions in terms of percentage capacity," Singh said.

Moreover, to boost its RE capacity and "transition away from the fossil fuels", the government is planning to come out with another tender to facilitate procurement of 4,000 MW of gas based electricity. It also plans to enhance its hydro based generation of power. "Already I have 1.8 GW of hydro capacity under construction and we have to start working for another

**R K SINGH,**  
POWER MINISTER

Our per capita consumption is the lowest in the world. What needs to be reduced is the emissions.

24,000 MW of hydro power," Singh said. "I'll be adding 42,000 MW of hydro capacity by 2030."

Addressing the country's network of transmission lines, Singh said that the country is not lagging behind but the pace of RE capacity addition is much faster than the building of transmission lines.

The final deal at the COP28 summit in Dubai called for "transitioning away from fossil fuels in energy systems, in a just, orderly and equitable manner, accelerating action in this critical decade" which came against the "phase-out" of fossil fuels as pleaded by more than 100 nations.
