

S.No	Particulars as mentioned in RFP	Query	Clarification
1		Is the scope of work for BEE's RFP limited to Energy Efficiency or does it also include renewable energy, energy & electricity access, economic development, environment sustainability and other parameters in GETI and RISE?	It includes all the perimeters under GETI, NETI and RISE
2		Given the diverse scope of the parameters in GETI and RISE, i.e. EE, RE, Access, Economic development, etc. it may be more appropriate to have a consortium of two or more parties bidding together. BEE is requested to allow a consortium of two or more parties to bid. If agreed, an amendment may be issued.	Consortium is allowed. Letter of Association of Consortium partners should be provided. No Agency should be part of more than One Consortium Appropriate amendments are made in the RFP.
3		The requirement of INR 50 crore turnover for each of the preceding three years seems very stringent. BEE is requested to consider lowering this turnover requirement. If agreed, an amendment may be issued.	Not considered necessary
4	Project Management	We suggest inclusion of a design / strategy phase in the overall scope of the project wherein the consultant should review global best practices of countries leading on key indices, analyze Indian context and priorities and create a customized roadmap and initiatives in consultation with BEE and other industry experts which will help improve India's global ranking	This is expected as part of the approach and methodology to be proposed by the bidder.
5	Monitoring of Data	The Agency should assess key problems, risks, challenges, bottlenecks in highlighting measures to mitigate the same. In which aspect should the challenges be highlighted? Please clarify	The Agency shall highlight the challenges in the indices in Indian Context.
6	Team Structure	Given most of the parameters in GETI rankings are related to macro-economic parameters & Energy related performance at macro level (like electricity prices, environment sustainability and access to energy), how is the specific requirement of a BEE certified energy auditor/Energy manager as team leader relevant for the success of this project? Instead it is suggested that the Team Leader should have 15+ years of experience in energy strategy & policy, energy transition & sustainability	Considered. Appropriate amendments are made in the RFP.

Also, we can provide CA certified provisional financial statements for FY 19-20 if needed	Considered. Appropriate amendments are made in the RFP.

However, we propose to make the confidentiality obligations in the Agreement mutual for both parties. Also, Confidential Information should not include information that: (a) is previously known to, or in the possession of, the receiving party without an obligation not to disclose; (b) is acquired by a receiving party from a third party which was not, to the receiving party's knowledge, under an obligation not to disclose such information; (c) which the receiving party can demonstrate was independently developed by or for the receiving party without reliance on any Confidential Information of the other party; (d) becomes publicly known and made generally available, through no breach of the Agreement; or (e) is disclosed pursuant to an order of any court of competent jurisdiction or any regulatory, judicial, governmental, or similar body or any taxation authority of competent jurisdiction requiring disclosure of the Confidential Information of the disclosing party, provided that, to the extent legally permitted, the receiving party shall promptly notify the disclosing party. Further, in the event any third-party materials or products or any of our proprietary products are used for the Deliverables or services, the terms and any licensing restrictions thereof shall be shared with the Client for compliance. Also, we shall not preclude the Client from sharing the Deliverables with any third parties, however, we request the Client to ensure that such third parties sign our standard non-reliance letter before the Client shares Deliverables and any third-party having access to the report or presentation or Deliverable may use it on a non-reliance basis. Not considered necessary based on the view of legal team
14	Terms of Payment	Considering the nature of services, the team and Client shall work closely, and the Deliverable should contain no surprises. In addition, by virtue of the nature of our Deliverables, it is impossible to create a meaningful, objective protocol for determining whether Deliverables comply with stated expectations. Therefore, we suggest removing the requirement for an acceptance of the Deliverables and the correlation between payment and acceptance. In the event the payment must be linked to acceptance, we suggest incorporating an acceptance criterion that the Client shall, within five (5) days of receipt of the Deliverable, provide us a notice, and we shall, upon receipt of such notice, promptly correct any material variances identified therein. Further, Deliverables shall be deemed accepted at such time as either (i) such Deliverable conforms to the specifications or descriptions agreed between the parties; (ii) upon review is deemed satisfactory to Client; or (iii) Client fails to submit the above-mentioned written notice within the acceptance period.
